

ERIC ALENTON

Full-Stack Web & Mobile Developer

Bukidnon, Philippines | Email: ericalenton35@gmail.com | GitHub: github.com/Doc3ric

Portfolio: <https://eric-portfolio-production.up.railway.app/>

PROFFESIONAL SUMMARY:

BSIT graduate and full-stack developer with hands-on experience building and maintaining production systems for government offices and educational institutions. Proficient in Laravel, PHP, MySQL, React, Flutter, Android, and Python, with experience developing human resource management systems, school information systems, and data-driven web applications. Proven ability to design, develop, deploy, and support scalable software solutions that improve operational efficiency and streamline business processes.

TECHNICAL SKILLS

- Core Technologies: Laravel, PHP, MySQL, JavaScript, React, Flutter, Python
- Backend Development: Node.js, Express.js, FastAPI, RESTful APIs
- Frontend Development: React, TailwindCSS, HTML5, CSS3, Bootstrap, Vite
- Mobile Development: Flutter, Dart, Android (Java), SQLite
- Databases: MySQL, Firebase Realtime Database, Firebase Firestore, MongoDB
- Tools & Platforms: Git, GitHub, Postman, Railway, Visual Studio Code, Composer, npm

PROFESSIONAL EXPERIENCE

HRMS Developer

Provincial Human Resource Management Office (PHRMO), Bukidnon 2026 – Present

- Maintain, enhance, and support a production Human Resource Management System (HRMS) used for managing government personnel records and HR operations.
- Develop new system features, resolve bugs, and optimize application performance to improve user experience and operational efficiency.
- Implement role-based access control, data validation, and security measures to ensure the integrity and confidentiality of employee information.
- Collaborate with HR personnel to streamline administrative processes through workflow automation and digital record management.
- Provide ongoing technical support, system maintenance, and database management.

Independent Full-Stack Web Developer

Kibalabag Elementary School, Bukidnon 2026 – Present

- Designed, developed, and deployed a School Management Information System using Laravel, PHP, TailwindCSS, and MySQL.
- Built a PTA Fee Management module supporting student registration, payment tracking, balance computation, partial payments, and automated sibling discounts.
- Developed Excel import tools, PDF report generation, and audit logging features to improve data accuracy and administrative efficiency.
- Designed a scalable architecture to support future Enrollment, Grading, Attendance Tracking, and Student Records modules.
- Provide ongoing system maintenance, feature enhancements, and technical support for school personnel.

IT Intern – HRMS Developer

Provincial Human Resource Management Office (PHRMO), Bukidnon 2026

- Developed a Human Resource Management Data System using Laravel, PHP, MySQL, and TailwindCSS.
- Automated HR processes including plantilla management, step increment calculations, and personnel data management.

- Built one-click PDF and DOCX generation for NOSI, NOLP, and NOSA documents, significantly reducing manual document preparation.
- Implemented advanced Excel import functionality with validation, rollback capability, and error handling mechanisms.
- Developed salary schedule management tools and data processing utilities to support HR operations.
- Participated in system testing, deployment, user support, and continuous improvement activities.

SELECTED PROJECTS

Dementia Care – Patient Monitoring System (Academic Capstone)

- Developed an Android-based patient monitoring system integrated with ESP8266 and NEO-6M GPS hardware for real-time location tracking.
- Implemented geofencing functionality using the Haversine Formula to detect safe-zone violations and trigger automated alerts.
- Integrated Firebase Realtime Database for live location synchronization and monitoring.
- Designed to assist caregivers in monitoring dementia patients and improving response times during wandering incidents.
- Tech Stack: Android (Java), Firebase, ESP8266, NEO-6M GPS

PropTrack NBA Analytics Dashboard

- Developed a sports analytics platform featuring player prop analysis, performance tracking, and consistency scoring.
- Built a FastAPI backend to process statistical data and provide analytics through RESTful APIs.
- Designed an interactive React dashboard with dynamic charts and trend visualizations for data-driven decision-making.
- Implemented modern frontend architecture using React and Vite for improved performance and user experience.
- Tech Stack: FastAPI, Python, React, Vite, JavaScript

BlockBurst Android Game

- Developed a Tetris-inspired drag-and-drop puzzle game for Android devices.
- Implemented Firebase Firestore integration to support real-time global leaderboards.
- Designed an in-game currency system and integrated AdMob advertising for monetization.
- Optimized gameplay mechanics and scoring systems to enhance user engagement.

EDUCATION:

2022 – 2026 | Bukidnon State University

Bachelor of Science and Information Technology

KEY ACHIEVEMENTS

- Successfully developed and deployed a Human Resource Management System (HRMS) for government HR operations, digitizing personnel records and administrative processes.
- Designed, developed, and maintain a live School Management Information System for an educational institution, supporting student and administrative record management.
- Built production-ready web and mobile applications using Laravel, React, Flutter, FastAPI, and Android technologies.
- Automated complex business processes including HR document generation, payroll-related computations, Excel data imports, and report generation.
- Developed and deployed full-stack solutions from requirements analysis and database design to implementation, testing, deployment, and maintenance.
- Demonstrated proficiency across multiple technology stacks, delivering web, mobile, database, and API-driven applications for real-world use cases.
